CONFIGURATION

HIGHLIGHTS

Utmost security

Optional card readers add an extra layer of security to the systems and allow you to restrict access to the devices. But they also make life easier as users can get direct access to their print jobs.

Multi Station Print Solution

Toshiba's server-less Multi Station Print Solution allows users to send print jobs from their desktop and retrieve them at up to 50 different MFPs within the network by authenticating at that device, e.g. by simply swiping their badge.

Advanced e-BRIDGE Technology

The e-BRIDGE Next architecture features an embedded web browser, enabling the MFP to easily connect to third-party systems.
